

WORLDS FIRST DECENTRALIZED SUSTAINABLE MICROFINANCE ECOSYSTEM

Problem

Out of the 7.5 billion human population, over 1.3 billion are below the poverty line suffering from extreme poverty while over 2.4 billion are unbanked. There is another group : refugees and immigrants. Together with young professionals, they represent a large group of people deprived of basic financial services. As a result they are victims of a global issue - poverty which deteriorate their ability to improve socioeconomically.

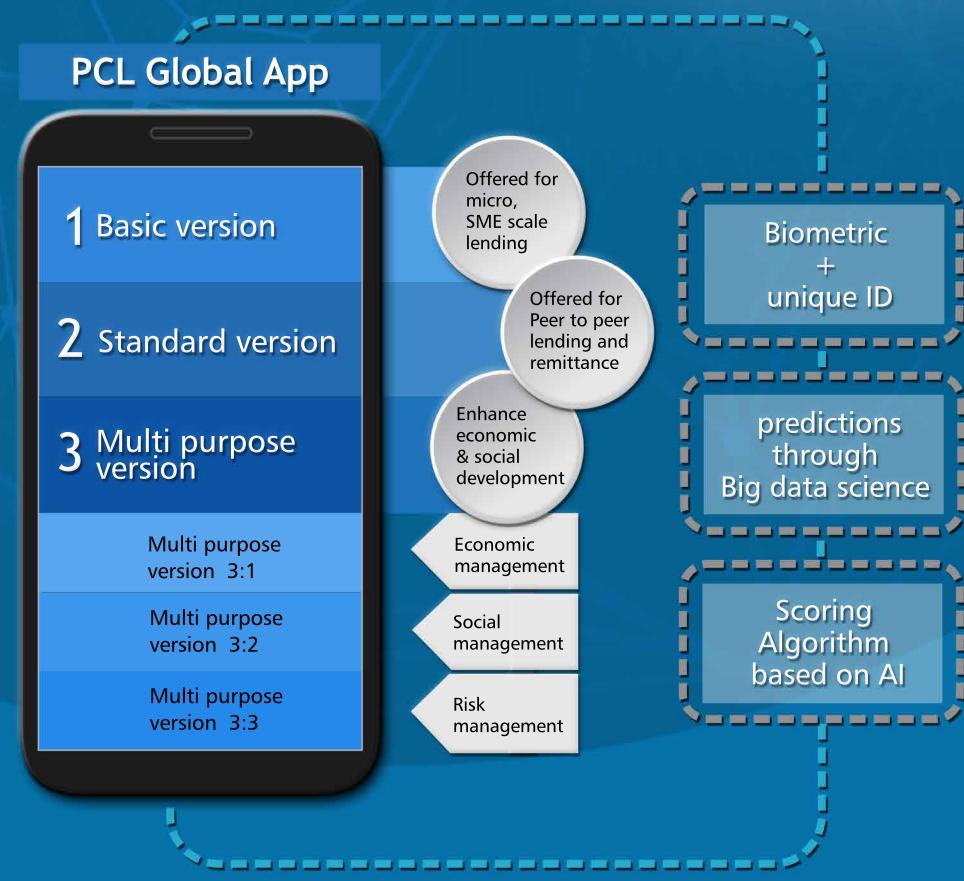

Goal

To build a robust and reliable ecosystem to provide the Micro and SME sectors with short term and long term loans as a mean of support to accomplish their financial needs.

Solution

To provide credit facility through the **open source decentralised**
